Technologies by Leading Companies

Special Event: IDF's Southern Relocation

One of the most elaborate IDF projects in recent years is the relocation of the Intelligence and C4I Corps bases to the Negev

NexTech 2019 will feature a special event on the IDF southern relocation as a reality-changing project with far-reaching implications for the region

The event will discuss the effects of the move, the challenges and opportunities it presents, and how the introduction of the military to the region will serve as a force-multiplier for the technological ecosystem.
